

Marketing Audit Report

Target: jemPOS — templates/landing.html (local, pre-launch)

July 7, 2026

Executive Summary

jemPOS's landing page has strong bones — credible pain-point copy, transparent pricing, and above-average front-end craft — but is not yet safe to launch: dead legal/consent links create a real Ley 1581 compliance risk, and an unsupported customer-base claim plus an easily-disproven "exclusive" feature claim create credibility risk. Fixing the legal links, the missing og:image, and the inconsistent trial messaging is under a day of work and removes the biggest risks before any real visitor arrives.

jemPOS

Score Breakdown

Category	Score	Weight	Status
Content & Messaging	60/100	25%	Solid
Conversion Optimization	52/100	20%	Needs Attention
SEO & Discoverability	58/100	20%	Needs Attention
Competitive Positioning	38/100	15%	Critical
Brand & Trust	38/100	10%	Critical
Growth & Strategy	45/100	10%	Needs Attention

Key Findings

Severity	Finding
Critical	Footer legal links AND the signup form's own terms-of-service consent checkbox (templates/auth/registro.html) point to href="#" — "Tratamiento de datos" is a Ley 1581 (Habeas Data) requirement in Colombia, not a cosmetic gap.
Critical	Final CTA claims "Únete a los negocios que ya venden... con jemPOS", implying an existing customer base, on a product with zero deployed traffic — an unsupported claim a prospect could easily discover is false.
High	static/img/og-cover.jpg is referenced by the Open Graph and Twitter Card meta tags but does not exist on disk — every social share (a likely acquisition channel via WhatsApp/Facebook in this market) renders a broken preview image.
High	No mention anywhere of DIAN / facturación electrónica, the headline feature of the two most obvious Colombian incumbents (Alegra, Siigo) and likely the first question a MiPyME buyer asks.
High	"Exclusivo de jemPOS" (employee cash-audit / balance tracking) is asserted without evidence; Loyverse's Employee Management and Square's Team Management already offer comparable functionality, making the exclusivity claim disprovable.
Medium	Trial-vs-freemium messaging is inconsistent: hero CTA implies a trial ("Iniciar prueba gratis" + "Sin tarjeta de crédito"), the Free plan CTA implies permanent freemium ("Crear cuenta gratis"), and the Negocio plan CTA specifies "prueba de 14 días".
Medium	Signup form (templates/auth/registro.html) requires 6 fields including NIT and teléfono before any product value is delivered, undercutting the "listo en 5 minutos" promise; form also has novalidate set with empty client-side error handling.
Medium	No About/team/company-legitimacy content anywhere — no founder story, address, or registration info for a product asking small business owners to hand over financial data.
Medium	Zero competitor-aware content (no "vs Alegra", "alternativas a Siigo", or comparison table) despite most buyers in this category actively comparing 2-3 tools before choosing.
Low	No JSON-LD structured data (SoftwareApplication/Organization schema) and no robots.txt/sitemap.xml anywhere in the project — missed low-effort SEO and AI-citability wins.
Low	Auth pages (registro.html, login.html) systematically drop Spanish accents/ñ ("Dueno", "Contrasena", "Cedula", "Telefono", "sesion") — inconsistent polish right at the conversion moment vs. the landing page's correct Spanish.
Low	WhatsApp is listed as a social channel but only as a dead footer link, despite being the primary sales/support channel this exact customer segment (Colombian MiPyMEs) actually uses.

Prioritized Action Plan

QUICK WINS — This Week

1. Wire real Términos, Política de Privacidad, and Tratamiento de Datos pages, and fix the signup form's own consent-checkbox links — currently all href="#", including at the point of data-processing consent.
2. Generate and upload static/img/og-cover.jpg (1200×630) so social shares stop rendering a broken image.
3. Unify trial-vs-freemium CTA copy across the hero and all three pricing cards so a visitor can tell what they're actually signing up for.
4. Replace the unsupported "Únete a los negocios que ya venden..." claim with an honest pre-launch line until real customers/testimonials exist.
5. Populate the #faq-footer section (currently empty despite the ID) with 4-5 objection-handling Q&As: seguridad de datos, cambio/cancelación de plan, funciona sin internet, soporte.

MEDIUM-TERM — 1-3 Months

1. Address DIAN / facturación electrónica explicitly — as a supported feature or a stated roadmap item — since its absence next to Alegra/Siigo is a likely silent deal-breaker.
2. Reduce signup friction: move nombre_negocio, NIT, and teléfono to a post-signup onboarding step so the first form only needs email + password.
3. Reframe the employee cash-audit differentiator with evidence instead of an unqualified "exclusive" claim, since comparable features exist at Loyverse/Square.
4. Build one comparison/alternatives page ("jemPOS vs. Alegra") targeting bottom-funnel searchers already comparing tools.
5. Add a minimal About/trust section: who built jemPOS, a real support contact, and company legitimacy signals.

STRATEGIC — 3-6 Months

1. Treat legal/compliance (Ley 1581 Tratamiento de Datos policy, RNBD registration) as a launch blocker, not a nice-to-have, before any public traffic reaches the signup form.
2. Build a content marketing / SEO program targeting MiPyME pain-point keywords (cuadre de caja, contabilidad para tiendas pequeñas) to reduce reliance on paid acquisition long-term.
3. Stand up a real social-proof program: systematically collect names/cities/quotes/usage stats as first customers onboard, replacing every currently-unsupported claim with a verifiable one.
4. Design a referral/growth loop (referral credits, WhatsApp-shared digital receipts as a viral surface) to keep CAC low against incumbents with years of brand accumulation.

Competitive Landscape

Factor	jemPOS	Alegra	Siigo	Loyverse
Positioning	Mobile-first POS + accounting + employee monitoring for MiPyMEs (pre-launch)	Established accounting-first suite for LATAM SMBs	Established Colombian accounting/POS incumbent	Mobile-first global POS with employee management
Pricing	Free / \$49.900 / \$99.900 COP per month — transparent public tiers	Tiered, mid-market	Tiered, mid-market	Freemium + paid add-ons
Social Proof	None yet (pre-launch, no live traffic)	Years of reviews, established brand	Years of reviews, established brand	Established app-store presence
Content	No DIAN/facturación mention; no blog or comparison content	DIAN/facturación electrónica as headline feature	DIAN/facturación electrónica as headline feature	Employee/shift management as a mainstream feature, not a differentiator

Methodology

Scoring Methodology

The Overall Marketing Score is a weighted average of six category scores, each evaluated on a 0-100 scale based on audit findings, code/content inspection, and where available, live site data.

Category	Weight	What It Measures
Content & Messaging	25%	Copy quality, value proposition, headline clarity, brand voice
Conversion Optimization	20%	Social proof, form design, CTA placement, objection handling
SEO & Discoverability	20%	Title tags, meta descriptions, headers, schema, page speed
Competitive Positioning	15%	Differentiation, pricing clarity, comparison content
Brand & Trust	10%	Design quality, trust badges, security indicators
Growth & Strategy	10%	Lead capture, content strategy, acquisition channels
